INTRODUCING THE INDEX AR SUPERAPP® PRODUCT FAMILY

Index AR unveils the SuperApp® family of pre-packaged AR applications, each tailored to address common workforce challenges across industry. Index AR is building a library of SuperApp® products over time, giving clients a selection of robust AR solutions that can be rapidly procured and deployed to meet specific business needs.

WHY A SUPERAPP® FOR GAS TECHNICIAN APPRENTICESHIPS?

The Index AR SuperApp® for Gas Technician Apprenticeships creates a combined AR and eBook training application for gas apprentice students that boosts engagement, standardizes best practices, captures knowledge transfer and worker safety.

The application is customizable, enabling clients to feature their own workers in the videography and photography elements embedded in the instructional content. This authenticity and flexibility increases camaraderie across the workforce, maintains customer focus and allows for constant improvement over time.

Purpose-built to help gas utilities develop new technicians efficiently and effectively, the Index AR SuperApp® for Gas Technician Apprenticeships replaces paper-based materials with a rich and highly visual, complete training platform. It features an interactive multimedia eBook paired with an AR learning experience that is loaded on each apprentice's work tablet for use in both training and in the field.

In addition to rich text, video and photos, the application includes 3D models, AR overlays, animations, and step-by-step navigations that teach company-approved procedures and best practices that are further enhanced with knowledge from the company's most experienced gas technicians. Important safety and equipment warnings are also built into the application, presented to the worker at just the right step of a given process or equipment visualization.

INDEX AR IS AN INVESTMENT IN PEOPLE

We don't augment reality, we augment people.

Our offerings:

- make people more capable and productive, and thus more valuable;
- augment and enhance worker performance (Index AR does NOT replace people); and
- create a sustainable competitive advantage for companies that adopt the technology early, resulting in a safer and more efficient environment.

HOW INDEX AR WORKS WITH CLIENTS

Our dedicated team of AR professionals uses its industrial experience, expertise and knowledge to create solutions for clients across a variety of industry verticals. Index is transforming the way work is performed in aerospace, construction, manufacturing, mining, shipbuilding, logistics, energy and utilities, equipment maintenance and operation, sales, workforce education and any other place where workers can benefit from rich visualization.

CONTACT US

AR is ready now. An enterprise can deploy AR and immediately reap the benefits of this investment in their people. Visit the Index AR Solutions YouTube channel to see first-hand worker experiences with AR, as well as worker testimonials. There is no reason to wait. Potential clients can get an on-site, hands-on demonstration.
